

Moving Compost Clubhouse off Linktree + Google Sheets onto one app for your drivers, you, Dominique, and the City of Columbus — without losing three years of history. A large portion is already built and working; this outlines what's done, what's next, and the cost to complete it.

ALREADY BUILT

Your data

- ✓ 22 sites & ~1,528 pickups imported since 2023
- ✓ Monthly reports match your sheet to the penny

Driver phone app

- ✓ Today's route, Start / End Route with run summary
- ✓ Bin size x fullness → auto weight
- ✓ Swapped / Loaded / Skipped (with reason)
- ✓ Damaged & needs-cleaning flags, photos, notes
- ✓ "On the way" text to Alum Creek / London

Dashboard (you & Dominique)

- ✓ Manage sites, schedules, bins, pause/archive
- ✓ Manage delivery destinations + SMS opt-in
- ✓ Diversion reports: lbs/tons/impact, CSV & PDF
- ✓ Route history & Dominique's program login

BUILT NEXT

- 1 **Truck operations** — running truck-weight tracker + "truck full → which facility?" prompt tied to the auto-text.
- 2 **Cart-cleaning queue** — yard screen for the bins drivers flag as needing cleaning.
- 3 **Quarterly contamination notes** — per-site observations carried into reports.
- 4 **Automated monthly emails** — each site gets its weight, cumulative & impact automatically.
- 5 **City of Columbus read-only login** — City views only their own diversion reports.

PRICING

Billed at **\$72/hour**. Next phase: **15–25 hours** covering development and testing. The range reflects how much we iterate together as you and your drivers use it.

SCENARIO	HOURS	COST
Low end — focused build, light iteration	15 hrs	\$1,080
High end — more iteration & refinement	25 hrs	\$1,800

Estimated total: \$1,080 – \$1,800 (development, testing on real data, in-scope fixes)

Two no-cost decisions for you: (1) the "cars off the road" figure — keep your current formula or switch to the standard EPA/ReFED number (one toggle); (2) all-time totals — the app reports only weight actually collected (no estimated gap-fills), so lifetime totals run lower but are more defensible. Monthly numbers match exactly either way.
